DETAILED ACTION

1. Due to examiner's error, the previous action had groups with incorrect claim numbers. The examiner apologizes for this inconvenience. The previous restriction requirement is rescinded and the new requirement is as follows.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-23, drawn to yaw control system and method, classified in class 303, subclass 146.
 - II. Claims 24-35, drawn to electromagnetic retarder, classified in class 188, subclass 158.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as yaw control system that uses regular friction brakes. In the instant case, invention II has separate utility such as eddy current brake that stops the vehicle under normal conditions. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3683

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 703-305-0580. The examiner can normally be reached on M-F 10 am-3 pm.
